Design bicycle rack for urban furniture h19192

Design two-level bicycle rack in galvanized steel and concrete. Available with 7 or 9 spaces, ideal for urban furniture and apartment buildings.

The **design bicycle rack for urban furniture h19192** is a robust and functional solution designed to optimize bicycle parking in public and private contexts. Characterized by a **two-level** structure with wheel-holder arches at different heights, it allows vehicles to be positioned in an orderly manner while reducing lateral bulk. The combination of **galvanized steel tubing** and lateral elements in **concrete conglomerate** guarantees high resistance to atmospheric agents and unauthorized movement attempts, solving the problem of urban disorder and parking safety in narrow spaces such as apartment buildings, squares, and parks.

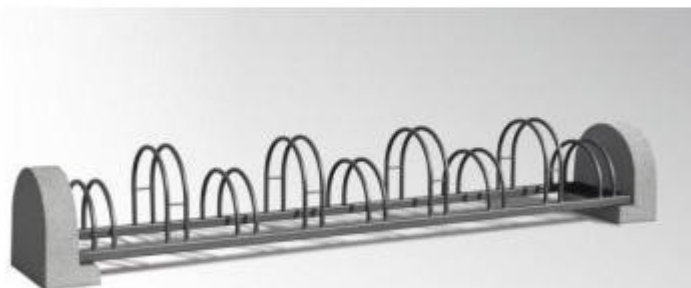

Technical features

- **Type:** Two-level bicycle rack
- **Structure material:** Galvanized and painted steel tubing
- **Support material:** Semicircular shaped concrete conglomerate
- **Rack color:** Micaceous grey
- **Available concrete finishes:** Occhialino, Verona red, Carrara white
- **Configurations:** 7 spaces (L 2250 mm) or 9 spaces (L 2920 mm)
- **Depth and height dimensions:** 480 x 500 mm
- **Weight:** 145 kg (7-space version) or 150 kg (9-space version)
- **Installation:** Rack to be assembled and fixed to the lateral elements
- **Equipment:** Assembly screws included
