

## Design conference room chair h770\_26

Design conference room chair with black polyamide shell and chrome-plated steel legs Ø 16 mm. Dimensions: 59 x 55 x h 79 cm.

The **design conference room chair h770\_26** is the perfect choice for those seeking a balance between modern aesthetics and functionality in professional contexts. The **PA6 polyamide** shell reinforced with glass, characterized by a **filigree finish**, not only guarantees a unique tactile and three-dimensional effect, but also ensures extraordinary resistance. The **black color** of the shell makes it elegant and adaptable to any interior style, ideal for conference rooms, classrooms, and professional environments.

The chair structure consists of **4 chrome-plated steel legs** with a diameter of 16 mm, providing optimal stability. U-section steel plates are welded to the legs, featuring holes to securely fix the shell using **4 screws** that connect to the threaded metal bushings in the shell. The **technopolymer feet** protect surfaces from scratches and marks, making the chair ideal for spaces with delicate flooring. This chair, with its ergonomic design, offers comfort and solidity, while also being a fully recyclable product, in line with today's environmental needs.

Buy your **h770\_26 design conference room chair** now! Perfect for completing your office or meeting space. Request a personalized quote for multiple orders.
