

Design cubic planter for urban furniture h330_38

Cubic planter for urban furniture in galvanized and painted steel and laser-cut external sheet metal. W. 600 x D. 600 x h. 650 mm. External sheet metal finish: pure white RAL 9010.

The **cubic planter h330_38** is an elegant and functional solution for urban furniture, designed to **last over time** and integrate perfectly into public spaces such as squares, sidewalks, courtyards and pedestrian areas.

The **base structure**, in **galvanized and painted steel and available in different colors**, guarantees **solidity and stability**, and is equipped with **4 pre-drilled holes for fixing**, ideal for installations in outdoor environments exposed to wind or frequent traffic.

The **external sheet metal** is also in **galvanized and painted steel**, processed with **laser cutting and bending** for a precise and clean finish. The standard color is **pure white RAL 9010**, but it is possible to **request different colors**, subject to evaluation and quotation, to best suit the architectural context.

A solid, versatile and aesthetically refined choice for urban furniture projects.

Enhance public spaces with the **h330_38 planter**, robust, functional and with a modern design.

Technical characteristics:

- **Dimensions:** W. 600 x D. 600 x h. 650 mm
- **Model:** cubic planter
- **Base structure:** galvanized and painted steel
- **Fixing:** 4 pre-drilled holes at the base
- **Structure colors:** different colors available
- **External sheet metal:** laser cutting and bending in galvanized and painted steel
- **Standard external sheet metal finish:** pure white RAL 9010
- **Use:** urban furniture and public outdoors

User benefits:

- **Solid structure:** made of galvanized and painted steel for high resistance to atmospheric agents.
- **Modern design:** cubic shape and clean finishes, suitable for contemporary urban contexts.
- **Customizable external sheet metal colors:** available in other shades upon request and quotation.
- **Secure fixing:** prepared with 4 holes for anchoring to the ground.
- **Low maintenance:** the protective coating allows for easy cleaning and durability over time.

FAQ:

1. **What is the material used for the planter?**
It is entirely made of galvanized and painted steel, both in the base and in the external sheet metal.
2. **Is it suitable for high traffic areas?**
Sì, its robustness and the possibility of fixing make it ideal for high-traffic public areas.

3. **Can I request the external sheet metal in another color?**

Yes, in addition to **white RAL 9010**, **other colors are available upon request**, with a quotation.

4. **What is the most suitable intended use?**

It is designed for urban furniture, but can also be used in corporate, condominium or residential environments.

5. **How is it kept in good condition?**

Regular cleaning with a cloth and neutral detergents is sufficient to preserve the paintwork.

Mini purchase guide:

The **cubic planter h330_38** is designed for those looking for a durable solution with a strong aesthetic impact for **urban furniture projects**. The **laser-processed sheet metal** makes it perfect for adapting to modern and functional public contexts.

The **galvanized steel structure** guarantees maximum resistance to atmospheric agents and the provision for **ground fixing** ensures stability even in exposed or crowded areas.

Ideal for **squares, avenues, sidewalks, courtyards and public green areas**, it integrates perfectly with other urban furniture elements.

Cubic planter for urban furniture, painted galvanized steel planter, modern outdoor planter, planter with pre-drilled base for fixing, white RAL 9010 planter, laser-cut planter.
