

Designer umbrella stand for indoor use h770_21

Technical umbrella stand h770_21 in satin stainless steel (34x35x50 cm). Minimal design with accident-prevention edges and removable drip tray.

The **h770_21 umbrella stand** is a professional furnishing solution designed for indoor environments requiring high aesthetic and functional standards. Made of **satin stainless steel** with a thickness of 0.8 mm, the body guarantees superior structural strength and a wear-resistant finish. The integration of **reinforced side edges** with double thickness, rounded and protruding by 10 mm, configures the product as a safe device, minimizing the risk of injury in high pedestrian traffic areas.

The liquid management system includes a **removable drip tray** in soft elastomer located at the bottom, designed to protect the base from impacts and reduce acoustic impact when inserting umbrellas. The upper part is equipped with a stainless steel ring with an **anti-extraction safety lock**, designed to maintain order and prevent accidental removal of components during daily use in public or private contexts.

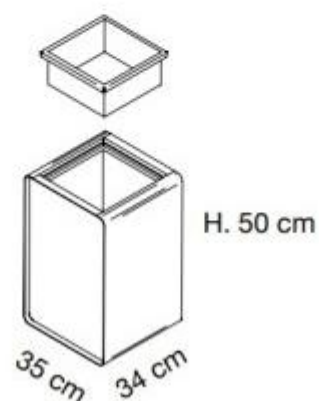

Technical features

- **Material:** Satin stainless steel 0.8 mm thick
- **Edges:** Reinforced and rounded for accident prevention, protruding by 10 mm
- **Drip tray:** Removable, in soft elastomer to cushion impacts and reduce noise
- **Umbrella ring:** With accidental anti-extraction safety lock, in satin stainless steel
- **Umbrella ring dimensions:** W 240 x D 240 mm
- **Total dimensions:** W 34 x D 35 x H 50 cm
