

Desk with wire mesh under-shelf h908_60

Single-seater steel school desk, 70x50 cm top, height 82 cm. Includes wire mesh under-shelf for educational organization in high schools.

The **single-seater school desk h908_60** is a technical furnishing solution developed specifically for the classrooms of high schools and higher education institutes. Designed to combine **ergonomics and mechanical resistance**, the desk meets the need for stable individual workstations capable of withstanding intensive and prolonged use over time.

The integration of a **wire mesh under-shelf** allows for optimal management of individual space: the student can store books and notebooks tidily, keeping the work surface free from clutter. The load-bearing structure, featuring **28 mm steel tubing** legs with a curved profile, ensures superior stability and a balanced distribution of loads.

Technical specifications

- **Structure:** High-resistance curved Ø28 mm steel tube legs.
- **Worktop:** 70 x 50 cm surface in scratch-resistant and durable material.
- **Storage compartment:** Electrowelded wire mesh under-shelf.
- **Fixed height:** 82 cm, optimized for tall students or high schools.
- **Safety:** Rounded corners and absence of sharp edges on the load-bearing structure.
