

Desk with wire mesh undershelf h908_58

Single-seat steel school desk, 70x50 cm top with rounded corners and wire mesh undershelf. Ideal for secondary and middle schools.

The **h908_58 single-seat school desk** is a technical solution designed for furnishing high-traffic classrooms, such as those in junior and senior high schools. The design focuses on the combination of **mechanical resistance** and ergonomics, offering a stable work surface that promotes correct posture and student concentration during prolonged activities. Thanks to the fixed-base design, it solves common instability issues typical of lightweight desks, ensuring a long service life even in intensive use contexts.

Technical features

- **Supporting structure:** 28 mm diameter steel tube frame with curved section for superior stability.
- **Worktop:** 70 x 50 cm surface with resistant finish and rounded perimeter corners for injury prevention.
- **Integrated undershelf:** storage compartment made of electro-welded wire mesh, ideal for storing books and teaching materials.
- **Overall dimensions:** Width 70 cm, Depth 50 cm, Height 71 cm.
- **Safety:** leg ends equipped with noise-reducing and anti-scratch caps for floor protection.
