

Dialysis chair h528_33

Dialysis chair, capacity 200 kg. 3 sections with continuously variable electric adjustment, operated by hand switch.

The **dialysis chair** is designed to ensure maximum patient comfort during therapy hours. Equipped with a **padded seat (padding thickness 90 mm)** to improve comfort and minimize any discomfort caused by long-term positioning and **complete with footrest** to relieve calf cramps **and armrests**. The armrests are adjustable and can be fixed in height, inclination and direction of rotation. The footrest can be adjusted according to the patient's height. Thanks to the **electric inclination adjustment**, which can be operated by the patient themselves **via a manual switch** with air pulse, it is possible to change the chair's inclination (as shown in the images). **The chair does not lie completely flat**. The armrests retract together with the chair, without the patient needing to change their orientation or rotation at each change of position

Technical features:

- 3-section reclining
- Steel frame in light grey RAL 7035
- Padded seat upholstered in blue synthetic leather
- Head/seat/foot section lengths: 800/470/550 mm
- Total length of head/seat/foot sections: 1820 mm
