

## Dialysis chair scale h634\_60

Chair scale for clinical treatments with thermosetting powder-coated steel frame. With integrated weighing system.

**Hemodialysis chair scale with integrated weighing system**, ideal for diagnostic centers and clinics. The product consists of an **anti-tip frame painted with thermosetting epoxy powders** enriched with antibacterial agent. The upper surface consists of three separate cushions: backrest, seat, and legs, functional for: excellent posture, ergonomics and preventive effect against pressure sores. **The upholstery is completely removable and available in a wide range of colors.** The product is characterized by simultaneous movement of the backrest and leg sections via 1 motor, armrests integrated with the backrest movement, removable, with rotation function, inclinable up/down, foldable to 90° and headrest integrated with the backrest. **A perimeter control panel equipped with a 3.5 m spiral cable allows for management of all movements.**

The weighing system allows weight reading via an LCD digital indicator with a 180° viewing angle easily visible beyond 20 m.
