

Diamond-shaped modular desk classroom 4.0 h 59 cm h908_127

Diamond-shaped school desk h908_127 in steel and recycled wood. Modular design for collaborative learning, height 59 cm, compliant with CAM requirements.

The **h908_127 diamond-shaped modular desk** is an advanced technical solution for **collaborative learning**, designed for the creation of **dynamic and flexible spaces** within modern school classrooms. Thanks to its specific **diamond geometry**, this module allows the aggregation of multiple units for customized configurations, facilitating the transition between frontal lessons, group work, and laboratory activities.

The **robust structure** consists of legs made of **steel tubing with a diameter of 40 mm**, a section that ensures maximum **stability and resistance** to the mechanical wear typical of intensive school environments. The work surface is made of a **100% recycled wood ecological panel**, guaranteeing full compliance with the **Minimum Environmental Criteria (CAM)** for public supplies. The height of **59 cm (size 3)** is calibrated to the ergonomic needs of **primary school students**, promoting the maintenance of correct posture.

Technical features

- **Dimensions:** W. 80 x L. 134 x D. 79.5 x h. 59 cm
- **Regulatory size:** 3
- **Model:** Diamond-shaped modular
- **Structure:** Ø 40 mm steel tube legs
- **Top:** 100% recycled wood ecological panel
- **Standard top color:** Orange
- **Environmental requirements:** Compliant with CAM requirements (Minimum Environmental Criteria)
- **Intended use:** Primary schools, modular classrooms, educational laboratories, School 4.0 projects

Optionals and customizations:

- Alternative top colors available upon request via dedicated color chart.
- Configuration of groups of 3 units for the creation of hexagons/complete rhomboid compositions.
