## Digital free-standing hotel safe for notebook h7605

Hotel safe capable of holding a 15" PC. Electronic motorized lock. LED display.

The **h7605 hotel safe** is a free-standing security module designed specifically for the needs of modern hospitality. Thanks to its generous dimensions, it can easily accommodate a **15" laptop**, offering guests a protected compartment for their technological devices. Security is managed by a **motorized lock** controlled by a high-reliability electronic device, with a programmable guest code from 3 to 6 digits. The structure is robust, with a **front and door thickness of 6 mm**, finished with black powder coating and equipped with internal LED lighting that activates automatically upon opening.

For professional management, the safe allows the programming of a Master code for the hotel manager's use and the display of the last 100 events. In case of need, there is a key lock for emergency opening, identical for all the hotel safes, which guarantees immediate access by the management.

## Technical features
