

## Digital hotel safe h31123

Motorized digital hotel safe with internal LED light and backlit display. History of the last 100 operations. Capacity: 16 liters.

The **motorized digital hotel safe** is the ideal solution for accommodation facilities wishing to offer a reliable security service with a simple design to their guests. This model stands out for its **laser-cut** precision and practical use guaranteed by the **backlit display** and the **internal LED light**, which makes it easy to see the contents in all conditions. Security management is advanced thanks to the possibility of setting a 4-digit guest code, the availability of 6 different master codes and the audit trail function which allows viewing the **history of the last 100 operations** performed.
