

Dining room service unit h684_103

Professional service unit for meal distribution (93x74,7x124,7h cm). Designed with two slanting internal stainless steel shelves, ideal for organizing trays, plates, cutlery and glasses in self-service lines or canteens.

The **restaurant dining room service unit** is a specialized workstation, designed to optimize the start of meal distribution lines in canteens, self-service areas and banquet halls. Thanks to its generous depth of approximately 75 cm, it offers a solid and spacious base for managing large volumes of tableware. The distinctive feature of this model is the presence of **two slanting internal stainless steel shelves**: this ergonomic shape facilitates the rapid insertion and removal of cutlery and glasses, while ensuring maximum hygiene and ease of cleaning. The top shelf and internal compartments are sized to accommodate stacks of trays and plates, ensuring an orderly and constant workflow.
