

Dish trolley for restaurants h2298

AISI 304 stainless steel dish trolley, 2x2 cm square tube structure, 2 shelves, 4 swivel wheels with brake, 84x51x116 cm, load capacity 120 kg. Italian product.

Specialized trolley for the **transport and storage of dishes** in high-frequency professional environments. Conceived for restaurant kitchens, corporate canteens, catering services, and HoReCa structures where efficient and safe handling of tableware is a priority.

The **load-bearing structure in 2x2 cm stainless steel square tube** guarantees structural robustness, while the **AISI 304 stainless steel sheet walls** ensure resistance to corrosion in humid environments and guarantee hygiene according to professional standards. The **inclined anti-tip support base** prevents accidental slipping of dishes during movement. The **4 swivel wheels Ø 12.5 cm, two of which with brake**, allow for optimal manoeuvrability in tight spaces and firmness during loading and unloading operations. The **grey rubber bumpers** protect surrounding walls and furniture.
