

Dismountable veterinary examination table h992_01

Dismountable stainless steel table with adjustable feet and top with drain. Dimensions: W 130 x D 60 x H 90 cm.

The **dismountable veterinary examination table H992_01** has been designed to ensure **maximum hygiene, functionality and resistance** in veterinary outpatient activities. Entirely made of **AISI 304 stainless steel**, it is ideal for veterinary surgeries, clinics, animal analysis laboratories and first aid facilities.

The material used, 304 stainless steel, is known for its **anticorrosive properties, ease of cleaning and compatibility with healthcare environments**, where hygienic management is fundamental. The structure is **robust and dismountable**, facilitating both maintenance and transport, and is particularly suitable even in the case of temporary setups or restricted spaces.

The worktop is equipped with an **integrated drain** for easy management of liquids during veterinary operations, and is prepared with **guides for inserting a collection tray**, further improving the efficiency of the table during operational phases.

The **levelling feet** allow for perfect adjustment even on irregular surfaces, guaranteeing stability and safety during examinations. The maximum capacity of **100 kg** makes it suitable even for medium-large sized animals.

Trust the quality of stainless steel for your veterinary clinic. Buy the **H992_01 table** now or request a quote for multiple supplies.

Technical characteristics:

- **Material:** AISI 304 stainless steel
- **Dimensions:** W 130 x D 60 x H 90 cm
- **Structure:** Dismountable
- **Worktop:** With integrated drain
