## Eco-friendly dog waste dispenser and container h19160

DogStation in galvanized steel with coin-operated dispenser and underlying container for dog waste collection. Modular structure made in Italy, 155 cm height, 35-kit capacity.

Complete system for the hygienic management of dog waste in urban public spaces. It combines an **upper controlled-distribution dispenser** (payment regulation with coins) and an **underlying container** for waste storage. The solution creates a functional and equipped area with reduced visual impact, meeting urban cleaning needs with restrained aesthetics.

Entirely designed and produced in Italy with superior quality materials, it guarantees durability in outdoor contexts.

## Technical features

- **Support post:** Ø 70 mm galvanized steel round tube
- **Dispenser (upper part):** 2 mm thick hot-dip galvanized laminated steel; assembly with metal series and A2 AISI 304 stainless steel screws; pull-lever coin mechanism with visible command and collection on the front; scoop distribution upon payment (10, 20, 50 cents)
- **Scoop:** cardboard scraper and polyethylene bag compliant with UNI 7315 guide standard; folded dimensions 12 x 7 cm; easy to use with integrated illustrated guides

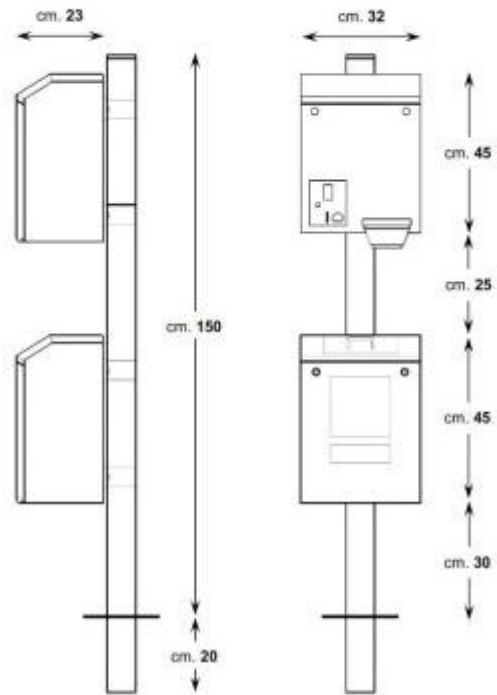

- **Container (lower part):** 2 mm thick hot-dip galvanized laminated steel; assembly with metal series and A2 AISI 304 stainless steel screws; opening front for emptying with 2 steel coded locks; upper access with small hatch; emptying by removing the internal bag fixed with an elastic band
- **Finish:** zinc + epoxy coating for outdoor use, "gunmetal" color (post, dispenser, container); "pastel yellow" logo panel (customizable)
- **Capacity:** 35 complete kits (scoop + disposable eco-friendly cardboard scraper + polyethylene bag)
- **Overall dimensions:** width 32 cm, depth 23 cm, height above ground 155 cm, part to be buried 35 cm, dispenser/container height 55 cm
- **Weight:** 70 kg
- **Fixing:** extension of the post into the ground; supplied fully assembled
- **Scoop loading:** opening of the coin mechanism cover with the supplied key, insertion of scoops from the top with dedicated loader, coin retrieval, closing with key
