

Display stand with fiberglass h757_30

Inclined stand with fiberglass top and stable structure. Dimensions: W 150 x D 120 x Rear leg H 90 cm and Front leg H 50 cm.

The **display stand with fiberglass H757_30** is the ideal solution for those looking for **functionality, resistance and safety** in the display of **fruit, vegetables and flowers**. Designed for intensive use in environments such as markets, fairs and itinerant exhibitions, it offers a sturdy work surface and a highly stable structure.

Built with **35x20 mm reinforced tubular profile** and **50 mm oval tubes**, this stand guarantees **high structural solidity**, while maintaining **ease of transport and assembly**. The **legs with a 98° angle opening** ensure perfect balance and excellent stability on any type of surface.

The top is covered in **blue thermo-glued fiberglass**, a material that guarantees **resistance, hygiene and ease of cleaning**. It is ideal for displaying fresh products in total safety.

Assembly is carried out via bolts and the **special hinges** facilitate the opening and closing of the stand, even in dynamic and high-frequency use contexts. The model shown in the photos does not include the fiberglass, but the **fiberglass** is nonetheless **included in the supply** of this model.

The presence of **anti-accident rounded corners in die-cast aluminum** makes it safe to use for both operators and customers. The stand is further reinforced by a **special insert profile**, designed to improve grip and distribute the load evenly.

Thanks to the different heights of the legs (90 cm rear and 50 cm front), the inclined surface promotes **better visibility and accessibility of the displayed products**, improving the presentation of the goods and the shopping experience.

Choose the H757_30 stand for a professional and effective display. **Order now or request a quote for multiple supplies.**
