

Disposable emergency thermal blanket h839_02

Disposable emergency thermal blanket in gold/silver PET 210x160 cm. DIN EN ISO 11092 certified thermal protection, professional pack of 200 pieces.

The **disposable emergency thermal blanket h839_02** is an essential protective device for first aid and emergency management. Made of **gold/silver dual-color PET film**, this equipment is designed to stabilize the patient's body temperature, offering an effective barrier against cold, heat, sunlight, and humidity. The product is intended for **healthcare professionals, rescue teams, civil protection, and safety professionals** who need a reliable solution to prevent hypothermia or heat stroke in critical contexts. Thanks to the optimized packaging in sub-units, it solves the problem of rapid distribution and stock organization during large-scale operations or in company first aid kits.
