

Document holder box h214_55

Red ABS document holder box (W26xD4.5xH32.5 cm) with lock, ideal for the protected storage of fire registers and certifications.

The document holder box is an essential logistic device for managing safety in workplaces and public facilities. Designed to centralize mandatory documentation, it allows for the orderly storage of the **fire equipment register**, emergency plans, and reports related to personnel training. The structure ensures that technical documentation is immediately available in case of inspections by supervisory bodies or during system maintenance operations.
