

Dog drinking fountain for public spaces h939_73

Drinking fountain h939_73 specifically for dogs in galvanized steel and AISI 316 stainless steel. Hygienic column design, push-button tap and lowered basin for parks and pet-friendly areas.

The **dog drinking fountain h939_73** is an urban furniture element with an exclusive design, specifically designed to guarantee pets access to drinking water in a comfortable and hygienic way. Made with a robust **galvanized steel structure** and subjected to a special anti-corrosion treatment, this drinking fountain solves the problem of water provision in public spaces, avoiding improvised or unhealthy solutions. The combination of a resistant supporting column and an **AISI 316 stainless steel basin** ensures exceptional longevity even in outdoor environments subject to intensive use, offering an essential service to improve coexistence between citizens and animals in green and urban areas.
