

## Dog station for parks with wooden bin h8668

Pressure-treated wood dog station for canine waste collection with integrated bag dispenser and signage. 20L capacity, ideal for parks and municipal gardens.

Complete solution for the hygienic management of dog waste in public and natural spaces. This **dog station** meets the need to keep parks, municipal gardens, and trails clean and tidy, making it easier for dog owners to dispose of waste. The essential design integrates discreetly into outdoor environments, while the full equipment of a dispenser and signage makes it immediately usable.

The bin is made of **pressure-treated wood**, a process that eliminates fungi and mold, ensuring durability over time, even in difficult weather conditions. The entire unit is designed to withstand public use and atmospheric agents.

## Technical characteristics
