

## Dog station for urban furniture h506\_01

Dog waste container with integrated bag dispenser, painted galvanized sheet metal, 40 liters, for parks and common areas.

The Dog station h506\_01 is a complete unit for dog waste collection and management, designed for public and residential environments. It combines in a single solution a high-capacity waste bin with an integrated bag dispenser, eliminating the need for separate installations and ensuring practical use for end users. The **locking front door** allows for quick and hygienic emptying, reducing maintenance time and exposure to waste.

The **powder-coated galvanized sheet metal** structure ensures durability in outdoor environments, resistance to corrosion and wear due to continuous exposure to atmospheric agents. Ground installation makes it stable and difficult to tip over, a critical element in high-traffic spaces.

## Technical features

- Material: **powder-coated galvanized sheet metal**
- Waste bin capacity: **40 liters**
- Bag dispenser capacity: **1200 bags**
- Equipment: **integrated bag dispenser**
- Access: **locking front door**
- Installation: **floor fixing**
- Dimensions: **W. 525 × D. 335 × H. 1205 mm**
- Available finishes: **various colors**
