

Dog station with bag dispenser h32640

Rotational HDPE dog station with 50L bin and 350-bag dispenser. Ground-fixed metal structure, ideal for public and residential spaces.

The **dog station** is a complete solution for the hygienic management of dog waste in public and residential areas. Designed for parks, municipal gardens, and common areas, it combines functionality and resistance to the environmental stresses typical of these contexts.

The system integrates a **waste collection bin** and a **bag dispenser** mounted on a metal structure equipped with a perforated base for stable fixing to the ground. The bin is manufactured using the **rotational high-density polyethylene (HDPE)** technique, a production process that ensures high resistance to impact, aging, and discoloration, guaranteeing durability even in environments exposed to climatic variations and intense use.

Technical characteristics

- **Bin material:** rotational HDPE
- **Bin capacity:** 50 liters
- **Dispenser capacity:** 350 bags
- **Width:** 47 cm
- **Depth:** 50 cm
- **Total height:** 175 cm
- **Total weight:** approx. 20 kg
- **Support structure:** metallic with perforated base for ground fixing

Available options

- **Colors:** Upon request, it is possible to order variants in red or white compared to the standard color
