

Dog station with bag dispenser h8649

Complete dog waste station with painted steel dispenser (500 bags) and 23-liter polypropylene bin. Essential design for public spaces.

Complete station for dog waste management, designed for public and residential environments. The dog station combines

practical functionality and aesthetic discretion, solving the problem of hygienic collection in parks, municipal gardens, boulevards, and urban centers. The system integrates a **painted steel dispenser with front opening** and a **dedicated recycled polypropylene bin**, a configuration that simplifies the maintenance and hygiene of public spaces.
