

Dog station with bin and bag dispenser h8666

Painted steel dog station with bag dispenser, signage, and 35 L bin for parks and residential gardens.

The **dog station** represents a complete and orderly solution for dog waste management in public and residential spaces. Combining functionality and aesthetics, the product offers managers of common areas an effective tool to maintain hygiene and promote civic awareness among dog owners. The treated and powder-coated steel structure ensures durability and resistance to weather conditions, while the sober design integrates discreetly into the surroundings.

The unit consists of a **front bag dispenser**, equipped with a key lock for consumption control, a **dedicated collection bin** with a bag holder ring to facilitate use, and a **signage board** communicating the station's function. The pole is designed for ground fixing, ensuring stability and safety.
