

Dog waste bag dispenser h19168

Column dispenser for dog waste collection bags, painted galvanized steel, 160 cm h., 750 bags capacity, tubular lock.

Vertical dispenser dedicated to the hygienic collection of dog waste, specifically designed for public spaces and common areas where it is necessary to facilitate dog owners in waste management.

The structure **made of 2 mm thick sheet steel**, laser-shaped and bent, guarantees robustness and durability over time. The parallelepiped shape with a rectangular base and a top face inclined at 60° favors the drainage of rainwater, while the **front door with a tubular security lock** allows exclusive access for bag replenishment. The front wall, hinged on side pins, serves simultaneously as an access flap and as a removable bottom, allowing the extraction of the bags through a specifically dimensioned slot.

The product arrives **complete with an initial load of 750 dark polyethylene bags** and a square section support (60x60 mm) that can be positioned at 45° in the specific rear seat. The support is designed for direct burial in the ground, ensuring stability and simplicity of installation.

Technical features

- **Material:** 2 mm thick sheet steel
- **Treatment:** Galvanization and painting
- **Finish:** Micaceous grey base color; dispenser colors according to the attached image
- **Total height:** 160 cm
- **Height above ground:** 140 cm
- **Dispenser height:** 55 cm
- **Width:** 32 cm
- **Depth:** 23 cm
- **Weight:** 25 kg
- **Closure:** Tubular security lock with key included
