

Dog waste bag dispenser h32621

Dog waste bag dispenser in thermo-perforated ABS, painted, triangular lock, capacity 350 bags, 22.8x44.5x9.5 cm.

Dispenser designed for the management and distribution of dog waste bags in public and residential areas. Made of **thermo-perforated ABS** and finished with **two-component paints** to ensure resistance to atmospheric agents and durability over time.

The structure is composed of two hinged parts: a sheet metal box housing the bags is fixed at the back, while the front part is equipped with a **triangular key lock** and a dispensing slot that allows for controlled bag distribution.

Installation is flexible: the dispenser can be fixed to existing street poles using stainless steel straps or directly to the wall with expansion bolts.

Technical features

- Material: **thermo-perforated ABS**
- Finish: two-component paints
- Closing system: **triangular key lock**
- Dispensing slot: 45 x 100 mm
- Capacity: approximately 350 bags
- Dimensions: 22.8 x 44.5 x 9.5 cm
- Fixing method: stainless steel straps (not included) or expansion bolts
