

Dog waste bag dispenser station h8667

Dog station in painted steel with bag dispenser (500 units), information sign and dog waste bin. Height 2280 mm, diameter 420 mm. Ideal for parks and public spaces.

The dog station is a complete solution designed for the hygienic management of dog waste in public and shared spaces. Made with **UV-resistant treated and powder-coated steel**, it combines practical functionality and durability, ensuring proper maintenance of urban hygiene in municipal gardens, public parks, and common areas of apartment buildings.

The system integrates a **front dog waste bag dispenser** with a key lock, an informative **sign** and a **bin with a lid** for waste collection, creating a standalone and self-sufficient device for environmental cleanliness.
