

Dog waste bin h35030

Dog waste bin in galvanized steel with key-locking tilting bin, 21 L capacity, height 123 cm, ideal for public spaces.

Dog waste bin designed for public environments such as parks, courtyards, avenues, and municipal gardens. The product meets the need to hygienically manage animal waste in shared spaces, reducing cleaning and maintenance issues in green areas.

The structure is made entirely of **galvanized steel sheet**, resistant to corrosion and atmospheric agents. The **tilting bin** is operated by **key release**, ensuring controlled access and hygienic safety. The 180°C oven-baked painting ensures durability and stable color performance over time. The support consists of a **galvanized steel round tube post** Ø 60 mm, sized to guarantee stability and mechanical resistance.

Technical characteristics

- Galvanized steel sheet bin
- Galvanized steel round tube post Ø 60 mm
- Bin dimensions: L. 31 x D. 26 x H. 45 cm
- Total post height: 123 cm
- Capacity: 21 L
- Weight: approx. 15 kg
- Bin colors: Green RAL 6029, Red RAL 3003
- Fixing: to be buried
- Painting: oven-baked at 180°C
