

Dog waste bin with ballastable base h326_48

ABS dog waste container with swivel lid, triangular lock, 18.5x16 cm anti-tamper opening, ballastable polyethylene base.

Specialized container for collecting dog waste, designed for public and condominium environments where hygiene, safety, and ease of management are necessary. It solves the problem of environmental contamination in common spaces by offering a controlled disposal system through regulated access.

The design combines practicality with protection: the **swivel lid with triangular key lock** allows opening only to authorized personnel, preventing unwanted access. The liftable **white ABS anti-tamper accessory** creates an **18.5x16 cm opening** wide enough for waste disposal without compromising safety.

The **painted ABS** structure guarantees resistance to atmospheric agents and ease of cleaning, while the **ballastable polyethylene base**, made with rotational molding, ensures stability even in windy areas without requiring fixed anchoring to the ground.

Technical characteristics

- Painted ABS bin
- Fixing: ground-standing (ballastable base)
- Container capacity: approx. 65 liters
- Height from ground: approx. 93 cm
- Lid dimensions: approx. 47x32 cm
- Base dimensions: approx. 48x42 cm (ballastable)
- Overall weight: approx. 9.5 kg (empty with ballastable base)
- Lid: swivel opening with triangular key lock
- Anti-tamper accessory: white ABS, 18.5x16 cm opening
