

Dog waste collection bin 50 lt. h32619

Dog waste collection bin in rotational polyethylene, 50 liters, anti-intrusion ABS lid, triangle lock, 47x42x68 cm.

Specialized container for the **hygienic collection of dog waste** in public and semi-public environments. Designed for installation near parks, municipal gardens, and avenues, it offers a discreet and functional solution to the problem of pet waste management in urban green spaces.

The **rotational molded polyethylene** structure guarantees mechanical resistance to impacts, durability over time, and color stability even under prolonged sun exposure. The **thermoformed ABS lid** is painted with high-quality two-component products, ensuring a resistant finish and professional appearance. Locking via a **triangle lock** prevents unauthorized access and tampering, maintaining the hygienic integrity of the contents. Emptying is carried out by bag, facilitating operational management and minimizing direct contact with waste.

Technical features

- Body material: polyethylene with rotational technology
- Lid: thermoformed ABS with two-component painting
- Locking system: triangle lock
- Capacity: 50 liters
- Dimensions: 47 x 42 x h.68 cm
- Fixing method: wall-mounted or on existing post
- Emptying system: via bag
