

## Dog waste collection bin h223\_07

Dog waste bin with integrated bag dispenser, tilting lid, and triangular locks. Structure 170x43.5x25.5 cm with screw-on round tube support.

The **dog waste bin h223\_07** is a complete solution for dog waste management in public spaces such as parks, gardens, and urban areas. It combines essential operational functionalities: **integrated bag dispenser**, **tilting lid** for waste disposal, and a robust locking system. The standard version features a screw-on installation on a **resistant round tube support**, ensuring structural stability in various environmental contexts.

The **front door** is protected by a **triangular lock** that allows forward opening for operational bag refilling. The same triangular locking mechanism is also present on the collection box, ensuring protection against unauthorized access and vandalism. Emptying is performed directly via a **drop-down container**, simplifying maintenance operations.

## Technical specifications

- **Material:** Structure with round tube support, resistant and stable
- **Dimensions:** Height 170 cm, width 43.5 cm, depth 25.5 cm
- **Locking system:** Triangular locks for the dispenser door and collection box
- **Lid:** Tilting for easy waste disposal
- **Installation:** Screwed onto solid surfaces
- **Emptying:** Drop-down container for direct emptying
- **Accessories included:** Metal triangular key and signaling sticker
- **Available finishes:** Various colors
