

## Dog waste collection bin h326\_54

Dog waste bin in ABS, 65L capacity, 175 cm height, fixed base with 4 holes, thermoformed lid with triangular lock and anti-intrusion accessory.

The dog waste collection bin is designed to **maintain cleanliness and hygiene in public spaces** such as parks, municipal streets and dedicated paths. The structure combines functionality and durability: the rectangular base and truncated cone-shaped container ensure stability, while the thermoformed ABS lid, secured by a **triangular lock**, ensures safe closure. The **anti-intrusion accessory in white methacrylate ABS** reduces unwanted access and contains odors.

Ground fixing is achieved via **4 Ø 11 mm holes** on the base, allowing stable anchoring on pavement and asphalt, which is essential for preventing tipping in high-traffic areas.

## Technical characteristics

- Material: **ABS**
- Capacity: **65 liters**
- Total dimensions: **W. 47 x D. 50 x H. 175 cm**
- Upper container dimensions: **30 x 45 x H. 75 cm**
- Anti-intrusion accessory opening: **18.5 x 15 cm**
- Fixing: **4 Ø 11 mm holes** on the base
- Weight: **19 kg**
- Closure: **Triangular lock**
- Anti-intrusion accessory: **White methacrylate ABS**
