

Dog waste collection container 40 L h86_83

Dog waste bin in treated steel with integrated 200-bag dispenser. Linear design, floor fixing, controlled dispensing.

Special bin designed for the collection and disposal of dog waste, equipped with an integrated dispenser containing **200 bags**. Made of **anti-corrosion treated steel and UV-resistant powder-coated steel**, it is a solution that reflects the community's commitment to maintaining urban hygiene and respecting public spaces. The linear and intuitive design encourages correct use and systematic cleaning of sidewalks.

Technical features

- **Material:** Anti-corrosion treated steel and UV-resistant powder-coated steel for durability and resistance to atmospheric agents
- **Dispensing system:** 200-bag dispenser with controlled bag-to-bag distribution and flow regulation
- **Dispenser opening:** Discreet and keyless, accessible by simply tilting the reservoir forward
- **Collection opening:** Reduced to limit the introduction of large objects and maintain the integrity of the container
- **Fixing:** 4 ground anchoring points for stability and safety
- **Signage:** Screen-printed incentive signs to guide the user towards correct use
