

Dog waste container 60 L h221_22

Rectangular dog waste container in galvanized steel with sloped roof, locking door and removable PE bag holder. 430x310x680 mm, 60 liters.

Container for the collection and storage of dog waste, designed for public environments and common areas with permanent exposure to the weather. The **corrosion-resistant galvanized steel** structure with oven-baked powder coating ensures durability over time and resistance to atmospheric agents. The **front-sloped roof** effectively protects against rainwater infiltration, keeping the interior dry at all times.

Practical management is facilitated by the **internal bag holder in shockproof, acid-resistant and washable PE**, which is removable to simplify waste removal. The **recessed front door with a double-lock universal key closure** allows for controlled and secure access. The external surface features an identification adhesive script and pictogram.

Technical specifications

- Structural material: **galvanized steel**
- Coating: oven-baked powder
- Roof color: dark gray
- Body color: light metallic gray
- Internal bag holder: shockproof, acid-resistant, removable PE
- Closure: **2 universal key locks**
- Dimensions: **W. 430 x D. 310 x H. 680 mm**
- Capacity: **60 liters**
