

Dog waste container h326_46

Dog waste container in ABS with rotating locking lid, integrated bag dispenser and polypropylene pole, for public and residential areas.

Container specifically designed for the hygienic collection of dog waste in **public spaces, parks, residential areas and avenues**. The painted ABS structure ensures resistance to outdoor conditions, while the rotating opening system with a triangular lock allows controlled access reserved for authorized personnel. The white anti-intrusion opening on the top of the lid facilitates waste insertion while maintaining the hygiene of the unit.

The integrated side dispenser holds up to 350 disposable bags, reducing operator travel and encouraging responsible use by citizens. Ground anchoring via a polypropylene pole ensures stability even in high-traffic environments.

Technical features

- Bin material: **painted ABS**
- Lid: rotating opening with triangular key lock
- Container dimensions: **W 51 x D 45 x H 120 cm**
- Bag dispenser: **W 22 x D 44 x H 95 cm**, capacity up to 350 bags
- Support pole: polypropylene, diameter 85 mm, wall thickness 7 mm, height 1080 mm
