

Dog waste container h521_01

Galvanized steel dog waste container, with lockable bag dispenser and inner bucket. 28.5x18x120 cm, weight 23 kg. Burgundy red.

Specialized container for the hygienic collection of dog waste, designed for public and residential environments such as parks, municipal gardens, and courtyards. Made of **galvanized steel**, it guarantees resistance to corrosion and durability over time, even in conditions of continuous exposure to atmospheric agents.

The system is complete with a **lockable bag dispenser**, which allows for the controlled and safe replenishment of collection bags. A **removable internal bucket** facilitates periodic cleaning and emptying operations of the container, reducing maintenance time.

Technical features

- Material: galvanized steel
- Color: burgundy red
- Integrated lockable bag dispenser
- Removable internal bucket
- Dimensions: W. 28.5 x D. 18 x h. 120 cm
- Weight: approximately 23 kg

The product is available on the MEPA portal for Public Administration purchases.
