

Dog waste container on concrete base h326_60

Dog waste collection container in HDPE polyethylene and ABS, capacity 65L, equipped with a concrete base and anti-intrusion system.

The **dog waste collection container** represents a technical solution dedicated to maintaining urban decor and hygiene in public contexts. The structure is made of **high-density polyethylene (HDPE)**, a material choice that guarantees high resistance to mechanical impacts and degradation processes caused by prolonged exposure to atmospheric agents. The system is completed by an **ABS lid** with a safety lock and a specific opening designed to prevent the disposal of non-compliant waste.

Technical features

- **Body material:** Impact-resistant high-density polyethylene (HDPE)
- **Lid material:** ABS with methacrylate white finish
- **Volumetric capacity:** approx. 65 liters
- **Total height:** approx. 93 cm
- **Container body height:** 75 cm
- **Upper section dimensions:** 30 x 45 cm
- **Lid dimensions:** 47 x 32 cm
- **Introduction system:** ABS anti-intrusion accessory with 18.5 x 16 cm opening
- **Security:** Lock with triangle key
- **Base:** Circular concrete, diameter 60 cm

INFORMATION

- **Tipologia** Contenitore deiezioni
- **Fixing** a terra
- **Width in millimeters** 470.000000
- **Depth in millimeters** 320.000000
- **Height in millimeters** 930.000000
