

Dog waste station totem h109242

Galvanized and painted steel dog waste totem container, 30 lt capacity, with bag dispenser and internal bin. Ground fixing, polyester finish, customizable colors.

The **dog waste container** is an essential urban furniture accessory to maintain the decorum and hygiene of streets, squares, and public parks. It represents a practical and tidy solution for managing waste left by dogs, facilitating responsible behavior by owners and contributing to the cleanliness of public space.

The totem is **composed of an integrated hygienic bag dispenser** and a **disposal bin**. The structure is made of **galvanized steel sheet painted with thermosetting polyester powders**, ensuring corrosion resistance and durability over time. The insertion of the bags takes place through a front hole shaped with **laser technology**, which allows for tidy and precise dispensing.

The design includes a **removable internal container** to facilitate emptying operations and bag refilling. Access is guaranteed by **two rear doors equipped with a lock with a universal key**, allowing use by maintenance personnel and protecting against tampering. A **plate with holes for ground fixing via anchor bolts** is welded to the base, ensuring stability and structural safety.

The availability of **different colors** makes the product versatile and suitable for any urban context and public furniture program.
