

Double animal recovery cage h938_08

Double stainless steel cage for animal recovery in veterinary clinics. Removable dividers, thermal and acoustic insulation. Dimensions W 183 x D 72 x H 91 cm.

The double cage **h938_08** is a professional solution for the hospitalization of animals in veterinary clinics, surgeries, and shelters. Built entirely of **stainless steel**, it guarantees resistance to corrosion, durability in intensive use environments, and the highest hygienic standard required in healthcare contexts. The stainless steel material allows for quick and deep cleaning, essential for the well-being of animals and the prevention of contamination.

The design includes **removable dividers** that allow the cage to be configured according to needs: two distinct spaces for medium-sized animals, or a single space for large-sized animals. The **thermal and acoustic insulation** reduces external noise and maintains an optimal temperature, improving the comfort of hospitalized animals and limiting stress levels.

Technical features

- **Material:** Entirely stainless steel
- **Dividers:** Removable for flexible internal space configuration
- **Insulation:** Thermal and acoustic
- **Dimensions:** W 183 x D 72 x H 91 cm
