

Double drinking fountain for public spaces h939_71

Double fountain h939_71 in galvanized steel with oxirón finish. Double push-button taps for people and dogs, stainless steel basin and base with cast iron grate.

The **h939_71 fountain for public spaces** is an inclusive and versatile solution designed for contemporary urban furniture. Made with a robust **square structure in galvanized steel**, this drinking fountain solves the need to provide accessible refreshment points for both users and their pets in a single integrated element. The **forged black oxirón powder coating** finish ensures superior protection against corrosion and atmospheric agents, while the **AISI 304 stainless steel drinking basin** guarantees hygiene and durability. Thanks to the base equipped with a cast iron grate and lower platform, the installation is stable and secure, perfectly meeting the needs of high-traffic parks and urban areas.
