

Double expandable barrier h774_01

Double-row expandable security barrier. Length: 710 cm. Material: 6060-T6 anodized aluminum.

Double-row expandable barrier specifically designed for use in stadiums, squares during concerts and events, and amusement parks. It is characterized by the presence of a double row that allows for the creation of sufficient space to prevent contact between the audience and people or objects on the opposite side. Made entirely of **anodized aluminum with stainless steel hardware**, making it resistant to weathering and the risk of breakage. **Particularly robust, self-supporting** and capable of withstanding high pressures. It features **quick and easy assembly** that does not require specialized personnel; furthermore, thanks to being expandable, it can be **folded in 5 seconds** by a single person and easily transported anywhere without taking up much space. Complete with **rubber wheels with locking system** that ensure excellent stability.

Technical features:

- Dimensions: L.710 x h.110 cm
- Weight: 79 kg
- Type: double-row
- Material: 6060-T6 anodized aluminum and stainless steel hardware
- Swivel blue rubber wheels, Ø100 mm; load capacity 180 kg
- Wheels with locking system, unlocking via simple pressure on the brakes
- Simple and quick assembly
- Easy storage and transport
- Foldable in seconds
- Minimal footprint
