

Double oxygen cylinder trolley h5511

Painted steel hospital trolley for transporting two Ø160 oxygen cylinders, solid rubber wheels, Italian production, CE compliant.

Hospital trolley specialized in the **transport of two Ø160 oxygen cylinders**, essential equipment for clinics and care homes. The robust structure guarantees stability during movement in hospital environments, while the **acrylic powder coating** ensures long-term resistance and ease of sanitization. Equipped with a **zinc-plated chain** for locking the cylinders and **two 200 mm solid rubber wheels** that offer smoothness without the risk of punctures. Made **entirely in Italy** according to current CE regulations.

Technical features
