

Double-sided advertising totem h738_195

Double-sided advertising totem h738_195 in lightweight sandwich, thickness 19 mm. 60x180 cm panel with interlocking crescent bases. Customizable.

The **double-sided advertising totem h738_195** is a freestanding display designed to offer maximum visibility in indoor promotional and informative contexts. Made entirely of **sandwich**, a composite plastic material characterized by extreme lightness, this totem is the ideal solution for temporary exhibitions that require frequent movement and repositioning. The main panel has a thickness of **19 mm** and a refined design with **rounded top corners**. Structural stability is guaranteed by two crescent bases with an interlocking system, designed for quick and intuitive assembly without the aid of complex tools. The surface is prepared for graphic customization (see optional) on both sides, optimizing visual communication from every point of observation.
