

Double-sided bike rack h32805

Hot-dip galvanized steel bike rack. Available in 3 and 5-seater models. Structure to be bolted to the ground. Minimum dimensions mm 924x352x258h

The **bike rack** is a practical urban furniture element, which allows for the creation of safe parking areas for bicycles. The **compact structure** with a **simple** and functional design makes this bike rack suitable for any urban and private context. In fact, it can be positioned near schools, parks, public gardens, gyms, offices or apartment buildings.

To ensure adequate resistance to atmospheric agents, the structure is made of **hot-dip galvanized steel**, and consists of **semi-circular wheel holders** to allow **bicycles to be positioned from both sides**.

The bike rack is equipped with two **perforated plates for anchoring** to the ground via expansion bolts (not included in the supply).

This product is available in 3 and 5-seater models
