

Double-sided fountain for urban furniture h140_377

Urban furniture human/dog fountain in galvanized steel (300x900x1000 mm). Structure with anti-theft stainless steel bowl and high-resistance two-tone design.

This **urban furniture fountain** represents an advanced solution for the management of contemporary public spaces, designed to meet the dual needs of citizens and pets. The design combines **modern aesthetics and structural robustness**, offering a hygienic and durable refreshment point within parks and pedestrian areas. The structure is composed of a central body and side panels in **galvanized sheet metal**, materials chosen for their high resistance to mechanical stress and atmospheric agents.

Technical features

- **Total dimensions:** L. 300 x D. 900 x h. 1000 mm
- **Main material:** High-thickness galvanized steel
- **Surface treatment:** Thermosetting powder coating for outdoor use
