

Double-sided urban furniture notice board h1003_09

Double-sided outdoor notice board in painted steel, ideal for public spaces. Dimensions: W 100 x D 8 x H 200 cm.

The **double-sided notice board H1003_09** is an urban furniture structure designed to provide a **clear, visible, and durable communication space** in outdoor environments. Thanks to its essential design and robust structure, it integrates perfectly into **urban contexts, squares, parks, entrances of public buildings, schools, or stations**, enhancing the information content aimed at the public.

The notice board is composed of **two vertical posts in galvanized steel**, painted with **thermosetting polyester powders**, ideal for long-term resistance to **weathering, humidity, and UV rays**. The panels are **double-sided**, offering wide visibility and allowing the insertion of personalized graphics on both sides (the **graphics are excluded**).

The communication surface can be customized with **digital printing or screen printing**, making the notice board suitable for **institutional messages, tourist information, city maps, or temporary postings**. The linear and elegant structure highlights the message without cluttering the surrounding space. It is available in **different RAL colors upon request**, for perfect aesthetic integration into the urban environment.

Customize communication in your public spaces! Order the **H1003_09 notice board** or request a quote for customized supplies.

Technical features:

- **Easily:** integrable in any urban environment.

FAQ:

1. **Is the notice board suitable for outdoor use?**

Yes, the structure is designed to withstand atmospheric agents.

2. **Do the panels include graphics?**

No, graphics are not included. They can be applied via digital or screen printing.

3. **Is it possible to choose the color of the structure?**

Yes, the notice board is available in various colors from the RAL chart, see photo.

4. **Are the panels double-sided?**

Yes, the notice board allows communication on both sides.

5. **Where can it be installed?**

It is ideal for public spaces such as squares, parks, building entrances, schools, or tourist areas.

Mini buying guide:

When selecting a notice board for outdoor use, it is fundamental that the structure is **weather-resistant** and made with durable materials such as painted galvanized steel.

The possibility of having **double-sided panels** increases the visibility of the message and allows for a more efficient use of space.

Evaluate if **graphic customization** is important for your needs: this model allows the application of printed graphics, even if not included in the supply.

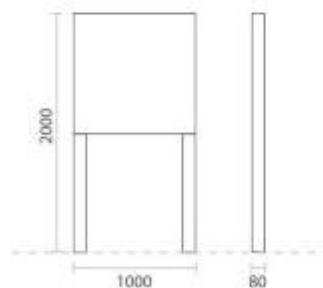

Finally, the **customizable RAL coloring** allows for harmonious integration with the surrounding urban environment.
