

Double wooden swing for playground h109251

Double swing in Nordic pine and steel, 320x175x240 cm. Includes flat seat and cradle seat for professional use in nurseries and playgrounds.

The double swing **h109251** is a professional play structure designed for installation in high-traffic outdoor play areas, such as nurseries, playrooms, and collective recreational spaces. The hybrid configuration combines the strength of **impregnated Nordic pine wood** with the structural stability of a powder-coated sheet metal box section supporting beam. This solution has been developed to meet the needs of contexts hosting children of different age groups, ensuring safety and mechanical durability.

Technical features

- **Structure:** Nordic pine posts with outdoor impregnation treatment.
- **Support beam:** Powder-coated sheet metal box section, weather-resistant.
- **Seats:** One flat seat and one rubber cradle seat with shock-absorbing inner core.
- **Suspension:** Tight-link chains connected to a pivot system with self-lubricating shielded bearings.
- **Age of use:** Certified for children from 1 to 12 years.
- **Drop height:** 135 cm.
- **Overall dimensions:** L.320 x D.175 x h.240 cm.
- **Required safety area:** 21 m².
