

Drinking fountain for dogs and people for urban furniture h939_72

Double fountain h939_72 in galvanized steel and AISI 316 stainless steel. Push-button taps at different heights for people and dogs, space-saving design and maximum corrosion resistance.

The **urban furniture fountain h939_72** is an advanced technical solution designed to promote hygiene and comfort in shared public spaces. Characterized by a **double tap** system, this drinking fountain offers dispensing points at different heights, ensuring separate and safe use for people and for dogs. The structure solves the problem of cross-contamination and facilitates access to drinking water in pet-friendly contexts. Made with a combination of **hot-dip galvanized steel** and **AISI 316 stainless steel** components, it ensures exceptional longevity even in environments subject to high humidity or aggressive atmospheric agents, representing a reliable investment for the redevelopment of parks and urban walking areas.

Technical features

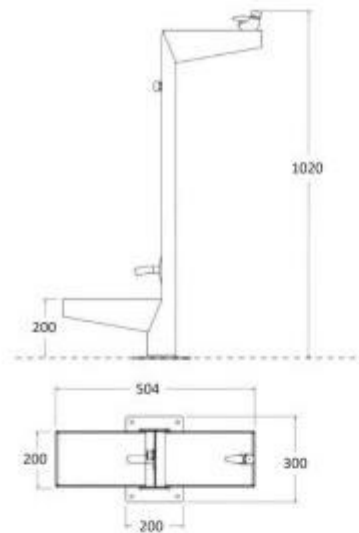

- **Supporting structure:** Hot-dip galvanized steel with special anti-corrosion treatment
- **Basins and supports material:** AISI 316 stainless steel (maximum salt and hygienic resistance)
- **Total height:** 1020 mm
- **Basin dimensions:** Width 200 mm; Total floor footprint 504 mm
- **Dog basin height:** 200 mm from the ground
- **Taps:** Chrome-plated push-button taps with stainless steel interior
- **Gaskets:** High-seal rubber for prolonged use
- **Anchoring base:** 200 x 300 mm steel plate pre-drilled for stable fixing to the ground
