

Drinking water storage tank h668_10

Closed-top vertical tank in LLDPE. Dimensions: external Ø 1090 x h. 1730 mm. Capacity: 1390 lt.

Closed-top tank, designed for the **collection of drinking water, rainwater and other food-grade liquids. Self-supporting monobloc structure in LLDPE, non-toxic linear polyethylene, UV-stabilized and 100% recyclable.** Suitable for outdoor use and not to be installed near heat sources. Its **capacity is 1390 lt.** Ideal for industrial use.

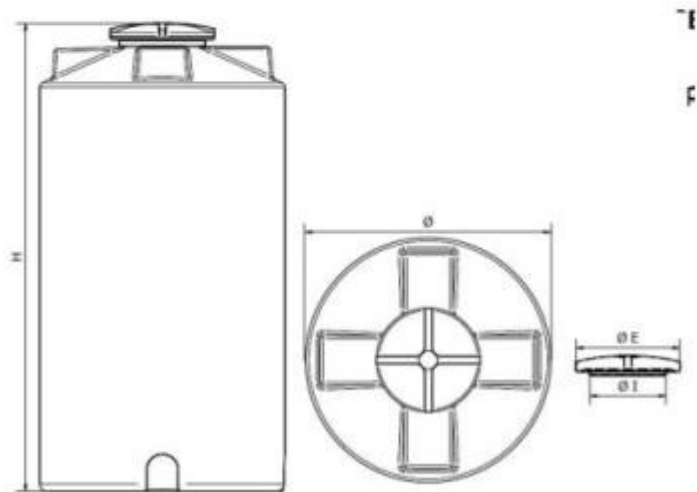

Technical features:

- Material: LLDPE, UV-stabilized and 100% recyclable
- Type: vertical
- Closed-top
- Washable
- Shock and chemical-resistant structure
- Male threaded closing cap
- Capacity: 1390 lt
- External diameter: 1090 mm
- Height: 1730 mm
- Measurements with overall tolerance $\pm 3\%$ and capacity $\pm 10\%$
- Inlet connection: 1"
- Outlet connection: 1"
- Lid external Ø: 560 mm
- Lid internal Ø: 380 mm
- Thermal range -20°C +40°C
- Liquid storage at atmospheric pressure
- For outdoor use
- Installation on a flat surface suitable for supporting the weight of the tank
- Full positioning on the base and leveled
