

Drum containment pallet with support h874_30

Liquid containment sump with integrated support, suitable for 1 x 200-liter drum. Dimensions: 1450 x 800 x h 1195 mm.

The **h874_30 drum containment pallet** is a versatile and safe solution for filling and storing industrial liquids such as oils, solvents, and other substances. Designed to accommodate **1 x 200-liter drum**, it combines **practicality, mobility, and safety** in a single product.

The sump is constructed with **3 mm steel sheet**, ensuring robustness and durability over time. It is equipped with a high-capacity **galvanized grid** (up to 1000 kg/m²), which ensures stability and support for the drum. Thanks to the presence of an **integrated perforated sheet support**, the drum can be securely fixed using the **locking strap**, allowing filling and emptying operations in total safety.

To facilitate mobility, the sump is equipped with **4 polyamide wheels, two fixed and two swivel (one with brake)**, with a diameter of 100 mm, ensuring agile and stable movement. The **hot-dip galvanized push handle** adds a further level of practicality for transport.

With a **collection volume** of **215 liters**, this sump is ideal for preventing accidental spills, keeping the work area clean and safe. The standard finish is in **RAL 5012**, but it is available, upon request and quotation, in other RAL colors or with a galvanized treatment for greater resistance to atmospheric agents.

Simplify and secure your filling and emptying operations with the **h874_30 sump**. A solid, mobile, and practical product for industrial liquid management. **Order now** and optimize your workspace!

Technical features:

- **Dimensions:** 1450 x 800 x h 1195 mm
- **Collection volume:** 215 liters
- **Weight:** 100 kg
- **Maximum capacity:** 1 x 200-liter drum
- **Sump material:** 3 mm steel sheet
- **Galvanized grid:** load capacity 1000 kg/m²
- **Integrated support:** perforated sheet with fixing strap
- **Mounting plate on the sump**
- **Wheels:** 4 polyamide wheels Ø 100 mm (2 fixed, 2 swivel of which 1 swivel with brake)
- **Push handle:** hot-dip galvanized
- **Color:** RAL 5012

User benefits:

- **Improved safety:** fixing strap for stable drum locking.
- **Simple handling:** swivel wheels and ergonomic handle for easy transport.
- **Efficient management:** integrated support for fast and safe filling and emptying operations.

- **Resistant structure:** high-quality materials for prolonged use in industrial environments.
- **Spill prevention:** adequate collection capacity to contain any leaks.

FAQ:

1. **Is this product suitable for filling industrial oils?**

Yes, the sump is designed to allow safe filling and emptying operations for oils and other industrial liquids.

2. **What is the advantage of the integrated support?**

The perforated sheet support, combined with the fixing strap, ensures greater stability of the drum during operations, reducing the risk of accidental displacement.

3. **Which wheels are included in the supply?**

The polyamide wheels have a diameter of 100 mm, with 2 fixed and 2 swivel (one swivel equipped with a brake) for safe and stable handling.

4. **What is the collection capacity of the sump?**

The sump has a collection volume of 215 liters, ideal for containing any spills during operations.

5. **Is this product suitable for outdoor environments?**

Yes, upon request and subject to a quotation, the sump can be requested with galvanized treatment to resist outdoor conditions and atmospheric agents.

Buying Guide:

The **h874_30 liquid containment sump** represents a reliable solution for managing industrial liquids in production environments. Designed to accommodate **one 200-liter drum**, it ensures safe filling and emptying operations thanks to the integrated support and fixing strap.

With a **robust structure** in 3 mm steel sheet and a **galvanized grid** with high load capacity, this sump adapts perfectly to intensive work contexts. **Mobility** is another strength: the swivel wheels and galvanized handles allow the product to be moved with ease, improving operational efficiency.

Before purchasing, evaluate the available space and the type of liquids to be managed.

Investing in the **h874_30 sump** means equipping yourself with a professional, safe, and versatile tool to optimize the storage and handling of industrial liquids.

Liquid containment sump, industrial drum sump, hazardous liquid containers, sump with galvanized grid, oil and solvent containment, mobile sumps with wheels, 200-liter drum storage, sump with integrated support, drum fixing strap, anti-corrosion sumps for industrial use, industrial liquid management, spill containers, RAL 5012 sump, containers for filling and emptying drums.
